Kaspersky® Anti-Virus

There's a lot of you – stored on your PC... how can you keep it all safe?

With so much of your life stored on your PC... you need to do all you can to protect it. So you need security that helps protect against the very latest viruses, ransomware and more... and lets you get on with the things you really want to do.

Kaspersky Anti-Virus gives you a smarter way to protect everything on your PC – to help you guard against viruses, Trojans, spyware and other dangerous infections. It helps to block ransomware – that could lock up all of your data – and it helps to block phishing websites that could try to steal your money & identity.

- Protects your PC – and everything on it – from viruses, spyware etc.
- Combines security & efficiency – so your PC performs as it was designed to
- Simplifies security – you can manage your protection via any online device

Defends your PC
Because there are so many confidential and sensitive things on your PC, our cloud-based security helps you to keep them safe from the latest infections.

Lets PCs perform
Slow security... is nearly as bad as no security. That's why we've taken care to combine protection & performance – so you can have rigorous PC security that won't slow you down.

Simplifies security
You can manage your PC security – from anywhere you can get online... and expert technical support is only a click away.
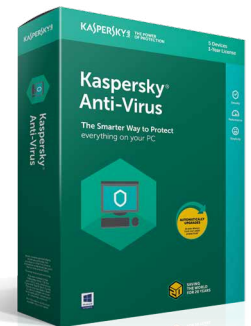

Kaspersky® Internet Security for Mac

It's not only about protecting your Mac… it's about protecting you

Because your Mac helps you get more out of your everyday life… You need more than just Mac security.

You need security that helps you live your life to the full… without constant worries about scammers, hackers & attackers and helps protect every aspect of your digital life… on your Mac.

Kaspersky Internet Security for Mac gives you so much more than just Mac security. It's a smarter way to protect your digital life. Award-winning security helps you to safeguard your privacy, identity, money and kids – so you can surf, shop, stream & socialize… more safely.

- Defends your digital life on your Mac – without slowing you down
- Helps you protect your privacy – so your private life stays private
- Adds extra security whenever you're online shopping or banking

Gives you award-winning protection

Cloud-assisted security helps to defend your Mac from infections... and warn you about dangerous website links – before you click on them.

Defends your privacy and more

Phishing, tracking and webcam spying help cybercriminals to intrude deep into your private life – and even steal your identity. That's why we help you to protect sensitive data, prevent online activities being tracked and stop your webcam being used to spy on you.

Connects more securely

Whenever you go online – even if you're using public Wi-Fi – we help protect your communications, identity & data. So you're free to surf, socialize, stream & more... while we help safeguard your privacy.*

Protects online shopping & banking

When you bank or shop online, we add extra layers of security... to help prevent thieves stealing your money.

Safeguards your children online

Because there are so many online dangers for kids, we've made it easier for you to guide your children to safety. You can block inappropriate websites & content and manage how your kids use social networks.

Lets your Mac perform

We've combined security and efficiency – so your Mac can keep performing as it was designed to... and you can do more of the things you really want to do.

Simplifies security

It's easy to set up & manage your security – from anywhere you can get online – and expert technical support is only a click away.
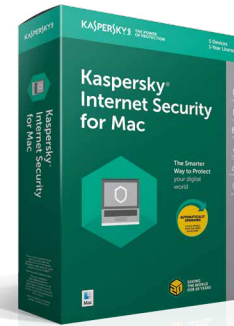

* Users with a valid Kaspersky Internet Security for Mac license can get a free copy of Secure Connection – from the Mac App Store.

WE WANT TO BE UNHACKABLE. NOW MORE THAN EVER.
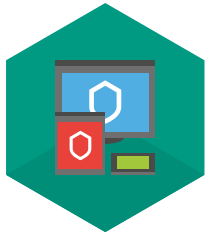

Kaspersky®
Internet Security

Who's protecting you... when you surf, shop & socialize?

You're always on your phone or online... so your digital security is important.

You need security that helps live your life to the full... without you constantly having to worry about scammers, hackers & attackers and helps protect every aspect of your digital life.

Kaspersky Internet Security is the smarter way to protect every aspect of your digital life... so it's safer to surf, socialize & shop – on PC, Mac & mobile. Award-winning security helps to defend you from spammers, scammers, hackers & attackers... plus it helps to guard your personal data, block trackers & stop webcam spies.

You can surf, socialize, shop & stream – while award-winning security helps safeguard you from infections, spam, phishing & dangerous websites. And, whenever you go online – even if you're using public Wi-Fi – we help protect your communications, identity and data.

- Defends you against viruses, attacks, fraud, snoopers, cybercrime & more
- Guards your privacy & personal data – against phishing, tracking & spying
- Automatically adds extra security when you're online shopping and banking

Secures with award-winning protection

Cloud-based security helps protect your digital life… from infections, spam, identity theft & banner adverts*.

Supports PC, Mac & mobile

Whatever combination of computers & Android devices you use, we help you stay safe… and if your phone or tablet goes missing, remote controls will help you lock it, wipe it & find it.

Defends your privacy & more

Phishing, tracking & spying can do a lot more than spoil your day. That's why we help you to protect your personal data, prevent your online behavior being tracked** and stop your webcam being used to spy on you**. You can also add security code locks for apps on your Android mobile.

Connects more securely

Whenever you go online – even if you use public Wi-Fi – we help protect your communications, identity & data. So you can surf, socialize & stream… while we help safeguard your privacy.**

Protects online shopping & banking

When you bank or shop online, we add extra layers of security… to help prevent thieves stealing your money.**

Safeguards your children online

Because there are so many online dangers for kids, we've made it easier for you to guide your children to safety. You can block inappropriate websites & content and manage how your kids use social networks.**

Lets your devices perform

We've combined security & efficiency – so all your devices can keep performing as they were designed to… and you can do more of the things you really want to do.

Simplifies security

It's easy to manage your security – from anywhere you can get online – and expert technical support is only a click away.
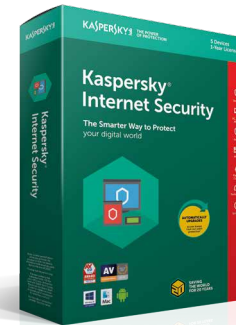

* For PCs only   ** For PCs & Mac computers only

Kaspersky® Total Security

Can you do more to protect your family... online and beyond?

You need to protect all your family – on all their devices – so they can surf, socialize, shop & stream... more safely.

You need security that does more to protect everyone – including your kids – online and beyond. That's why you need security that helps protect your family's digital world – on PC, Mac & mobile.

Kaspersky Total Security is the smarter way to protect every aspect of your family's digital world. It helps protect against infections, fraud, identity theft and more – plus it gives you extra security for your family's photos, documents, music & passwords... and powerful tools that help you find new ways to guide your kids to safety.

- Protects your family's privacy, passwords, data and precious memories
- Automatically adds an extra layer of security for online shopping & banking
- Includes Kaspersky Safe Kids – to protect your kids on PC, Mac & mobile

Secures with award-winning protection

Your family can surf, shop & socialize... while we help to block viruses, spam, banner adverts and dangerous websites*.

Supports PC, Mac & mobile

We help you protect all your family's computers & Android devices... and if a phone or tablet goes missing, remote controls help to lock it, wipe it & find it.

Defends your family's privacy & more

Because phishing, tracking & spying are major security risks for all families, we help you to protect personal data, prevent online behavior being tracked** & stop spies accessing your family's webcams**. Our App Lock feature lets your family add security code locks for apps on Android devices.

Connects more securely

Whenever a family member goes online – even if they're using public Wi-Fi – we help protect their communications, identities & data.**

Protects online shopping & banking

When a family member is banking or shopping online, we add extra layers of security... to help prevent thieves stealing your family's money.**

## Boosts security for your kids

Whether your children are using their mobiles or computers to surf, play or socialize, we give you powerful ways to help you guide your kids to safety – in the online world... and beyond. You can regulate the use of apps & devices – plus check your child's location & get an alert if they leave the 'safe area' that you define.

Saves time & hassle

Signing in to websites & online accounts is easier, faster & more secure – with no need to remember every password. All your family's passwords are securely stored – ready for access from computer, tablet, phone or your family's free My Kaspersky accounts.

Preserves precious files

By creating backup copies of their files, your family can guard against losing precious photos, music or memories – plus data encryption helps to make files unreadable for hackers.*
